Pecksniffism.

The Washington States and Union very irrev erently denominates the "Constitutional Union Party, which recently convened at the National Hotel in Washington City, "the Pecksniff Party," a monstrous holy party, which abhors spoils and office, for others, and exhibits its own sincerity, by having one of its ex-Congressmen a door-keeper to Congress, and another an appointee under Forney, while the ex-Governor of the third State in the Union, Ford of Ohio, indicates his sincere detestation of the spoils by taking the appointment of public printer to the House of Representatives.

Further, Tennessee, North Carolina, Kentucky and Virginia have held State Conventions, in pursuance of the call of the committee of the " Constitutional Union Party," which met at the National Hotel in Washington City, and each of these Conventions, with the exception of Virginia, has exhibited its forgetfulness of spoils and office by bringing forward a candidate for the Presidency. Kentucky puts forth Crittenden: Ten-Virginia would have put forth Botts, but he was rather too wormy to be stomached, and rather too strong to be thrown overboard for any other person, so Virginia had to put no candidate in the field. The object of all these manocuvres we will endeavor hereafter to explain. It is quite Pecksniffian.

In the Senate of the last Legislature of North Carolina, an attempt was made to take the initiative for a stood sectional compromise of the Constitution of North | P. Lytle as Secretaries. Carolina. It fell cold as a wedge-there was then, comparatively speaking, none so poor as do it reverence .-John Pool of Pasquotank, was not one of those who did it reverence, but he was one of those who did not do it and H. A. Maynard. reverence. In one brief year, on the supposition that capital might be made out of it, taking the hint from were unananimously adopted: certain erratic movements and disturbing elements in the fourth district, this party, which abhors spoils and the thirst for office, takes up this hobby as a party issue, making of this rejected timber the chief plank in their platform, upon which they place, apparently in derision, one of their main builders by whom this plank had been but the other day rejected. For what purpose, but that they may ride into office?

The Constitution of North Carolina was made for the people for the Constitution, and the people and not the people for the Constitution, and the people for the Constitution is the people for the Constitution in the people for the Constitution is the people for the Constitution is the people for the Constitution in the people for the Constitution is the people for the Constitution if the people really want any change, it is not for any one to say that that change shall not be made, but we do say, that we look upon the existing status of negro property with reference to taxation as part of the sectional compromise of 1835, and we say, further, that neither in State nor National affairs can the Democratic | Meredith, Sam'l Andres, James Allen, Jas. W. Lesesne, Love party consent to array itself upon a sectional issue, or for the abrogation of constitutional compromises of sectional difficulties. If the people of both sections of the State are desirous that this thing should be done, let them say so through their delegates to both branches of

the State Legislature. Free suffrage is not a parallel case at all, since its opcration did not and could not disturb any sectional compromise, nor nullify any existing arrangement between different portions of the State, nor operate unequally in such to Mr. ex-Governor, ex-Senator, ex-Secretary, ex-Vice Presidential candidate Graham, or Mr. ex-Senator, ex-Secretary Badger, or Mr. ex-Congressman, ex-Gubernatorial candidate Gen. Dockery? Indeed, we might go on and make a long list of the disinterested, but we

We have a few words to say about the state of the Presidential field. The policy so far adopted seems to be, to put up a candidate in nearly every State, where any hope exists of doing anything. There being no chance on earth to elect an American, or New Party man by any sort of concentration upon him, the object seems to be to scatter the candidates around among the States of the South, and then, by flattering State pride, carry off some votes from the Democrats, thereby throwing the election into the House. Having gained experience in wire-working for Speaker, they may thus hope to share in the spoils of office, even if they do not secure the Presidency, for there is such a thing as understandparty" hates office and spoils as long as it can't get them. It is a holy party, but will bear watching.

We see little or nothing that Congress is doing. Our yesterday's dispatch very properly characterized the Senate proceedings as "unimportant." On Tuesday, the 28th ult., the chair laid before the Senate a statement of the number and designation of the passengers arriving in the United States during the year 1849, to wit :-155,302. Of these probably one-fifth were Americans returning, business travelers, or others not classable as emigrants, of whom we do not think there were over

boundary survey between the United States and Great Britain, as provided by the treaty of 1846-about uniform or costume prescribed for persons in the diplomatic or consular service of the United States, etc., etc.

Mr. Foot, from the committee on claims, reported a bill declaratory of the acts for carrying into effect the ninth article of the treaty between the United States and Spain. Read, and passed to a second reading.

The House was occupied with the discussion of a bill reported from the committee of ways and means, proposing, instead of the present mileage of members, to allow 20 cents per mile, to be computed by a straight geographical line. The present allowance is 40 cents per mile, and by the most direct traveled route.

Mr. Sherman said that some of the members now receive five or six thousand dollars mileage. The original bill, for which the bill of the committee is offered as a substitute, provides that after the fourth of March last, the actual expenses of members and their families, in traveling, should be paid. In regard to this bill, Mr. John Cochran desired light. A patriarch from Utah with his family attendants, was to be provided for, while a poor batchelor like himself, was to come here alone.-The substitute (20 cents per mile) was agreed to by four majority. Further proceedings were interrupted by Mr. Ruffin, who offered a motion to correct Monday's journal, his name having been omitted in the last vote taken for printer. Should it be inserted, the election of ex-Governor Ford as printer of the House will be vitia-

The canvass in this State will fully commence about the first of May, we suppose-that is to say, the candidates for Governor will commence about then to run that fearful gauntlet of stumping a State five or six hundred miles long, and pear about three hundred wide at its seacoast, with between eighty and ninety county dates to te 15th ult. seats and innumerable other places where "appoint-

ments" must be made and fulfilled. We suppose it is all right, but we are not sure of it It is a horrible labor, and part of it is undertaken at a time of the year the least favorable for severe exertion. Three months of a solid canvass is a high price to pay for any honors or powers appertaining to any office; sometimes too, life itself is the forfeit, as in the case of the lamented Hoke. If hard enough even upon the successful competitor, how hard must it come upon him who is defeated, as one at least of the candidates must be, since only one can be elected.

The Democratic Convention will have met and adjourned by the the time the canvass on the stump fairly opens in this State, and the batteries of the opposition will all be turned upon the candidates and the platform of the Charleston Convention, who alone will be in the field to bear the brunt of the battle. Even the Republicans will have no candidate until later in the Summer.

The Missouri opposition Convention go for Bates .-The Free Soilers, Republicans, etc., etc., of the North nessee John Bell; North Carolina W. A. Graham, and and East, outside of Pennsylvania, perhaps, go for Seward, and even Pennsylvania will come in to him. He has has made his coup, and is said to have succeeded in time till July and many things may happen.

Excitement at Louisville, Ky. Louisville, Kv., Feb. 27 .- A man calling himself John Haskell, hailing from Massachusetts, but who is said to be an Englishman and a sailor, recently from New Orleans, was arrested in this city on Saturday for committing an outrage on three boys. This forenoon a crowd gathered about the court-house, increasing in numengine to the spot, to drive away the crowd. This was temporarily successful, but towards dark the crowd throw the liberal government in Sonora has been discov-ered and frustrated.

on the jail and application of lynch law to the prisoner was apprehended. The military were ordered to hold themselves in readiness. Two pieces of cannon were placed inside of the jail, and the police marshalled .-The latter kept the square in front of the jail clear and arrested several intoxicated and turbulent persons. This evening Judge Bullock addressed the crowd, saying that the parents of the victims desired no riotous proceedings, but were willing that the prisoner should be dealt with

At this, (ten o'clock p. m.,) the crowd is gradually dispersing, although a spirit of great indignation still exists against the prisoner. The fears of an attack on the jail to-night are subsiding.

TO THE MERCHANTS OF THE SOUTH,

WHO BUY FOR

CASH WE BEG to inform the Merchants of the South, that to the future we will conduct our business expressly with view to the wants of the Southern Trade. The handsome patronage which this trade has bestowed upon us, since wa commenced business, has induced us to adopt this course Moreover, the prosperity of the South is increasing the number of merchants, and creating competition that compels closer buying than has hitherto prevailed. The best Merchants now buy largely for cash, and the number of such buyers are rabidly increasing. We do not at present know of any cash Dry Goods House in New York that ad. dresses itself particularly to the Southern Trade, and we embrace the opening thus afforded to announce that we will conduct our business and purchases expressly with a view

to Southern wants. We earnestly commend to the consideration of all who can buy for cash the ollowing statement of the nature of one business, which we think will convince them that at least our stock is worthy of an examination. We buy for Cash exclusively, largely at auction, also at Sheriffs' sales and wherever money commands low prices, and we sell for Cash exclusively; thus we neither pay nor chasge for the risk of Credit, and besides making no losses, we conduct our business with small expense. We are in Old Courtlandt street, where rents are cheap, and we keep no costly salesman, nor send abroad at more costly travelers or collecting agents, which is no trifling item of expense to our credit houses. Our stock will be found somewhat irregular, because we only buy such goods as we can obtain at less than market rates, but we make it an aim to deal in fresh and desirable goods only, and if we ever have anythat are otherwise, they shall be fairly represented.

There are numbers of merchants throughout the country who have never tried what cash can do in New York. We respectfully urge all such to try the experiment, and believe we are warranted in assuring them that except on leading domestic goods, a REASONABLE RETAIL PROFIT CAN

For ourselves we promise fair and honorable dealing to all who may patronise us, and with confidence refer all who throughout the Southern States, one or more of whom may be found in most of the important business towns. We are sure they will cordially bear testimony to our respectability

N CALLING THE ATTENTION of the public to this valuable and recently discovered deposit of this fertile zing article, we will merely state, that like all other phosphoric guanos, it's most valuable constituent is phosphoric acid, or bone phosphate of lime; and that its mercantile value, as compared with other guanos of its kind, may be easily determined by the amount of phosphoric acid or bone phosphate of lime it contains. In order, therefore, to give the public a thorough knowledge of what Sombrero guand does contain, we beg to refer to the following list of eminen chemists in different parts of the world, who have analyzed it from average samples taken by themselves from the cargoes just as they arrive from the island, without drying of selection of specimens for analyzation. Each analysis will be exhibited, if required under the original signature of each
